1	Short cuts	3
2	Tips	3
2.1	Go to usr folder	3
3	Software	3
3.1	valgrind	3
4	NTFS IO	3

1 Short cuts

- Open a folder:
Ctrl + downArrow or **Ctrl + o**
- Delete Backward: delete;
- Delete Forward: fn + delete.

2 Tips

2.1 Go to usr folder

Under **Go**, choose **Go to folder**.

3 Software

3.1 valgrind

Command: **brew install valgrind**

Use: **valgrind -leak-check=yes ./program;**

4 ntfs IO

in **Terminal** input:

```
1 sudo vi /etc/fstab
```

in **Vi** input:

```
1 LABEL=<name without quotes> none ntfs rw,auto,nobrowse
```

then press **Esc** and input

```
1 <:wq>
```

to save and quit. Then in **Terminal**, input:

```
1 diskutil unmount <name without quotes>
2 diskutil mount <name without quotes>
```

5 open volumes

In **Terminal**, input:

```
1 open /Volumes
```
