# 1 ShortCuts

- **Ctrl+d**: deselection.
- **Ctrl+Alt+z** undo.
- **Ctrl+j** create a new layer from selection.

## 2 Quick Selection Tool Vs Magic Wand Tool

### 2.1 Quick Selection Tool

- Choose this tool and swipe to select interested areas.
- **Shift+swipe** to add selection
- **Alt or Opt+swipe** to deselection
- use [ to zoom in the brush, or ] to zoom out the brush.

### 2.2 Magic Wand Tool

- Choose this tool and click to select interested areas.
- **Shift+left button click** to add selection.
- **Ctrl or Opt+left button click** to deselection.

## 3 Change Canvas Size

Under **Image Menu**, sometimes **Trim** works, sometimes **Reveal all** works, sometimes need to use **Based On Transparent Pixels** to make **Trim** work, as shown in fig 1.
