1.3	Export as Gif	2

1 Create Gif in Photoshop

1.1 Import image sequence

Use **Ctrl + o** or simply go to **File** and **Open** to select the first image and then tick **Image Sequence** as shown 1.

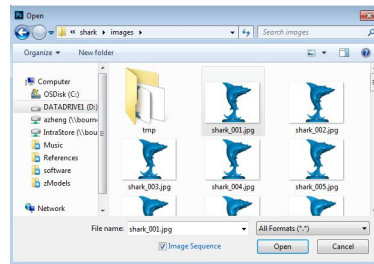

Figure 1: import image sequence in PS

1.2 Tool setting

Then goto left side of panel and change from **Essentials** to **3D** or **Motion**

Figure 2: tool setting

1.3 Export as Gif

Then I can go to **File, Export, Save for Web** and change settings and generate gif. Done!
