1 Create Movie in After Effects

1.1 Import image sequence in After Effects

In **After Effects**, under **File**, go to **Import...** and choose the first image of the sequence. By default, the import will import the whole sequence.

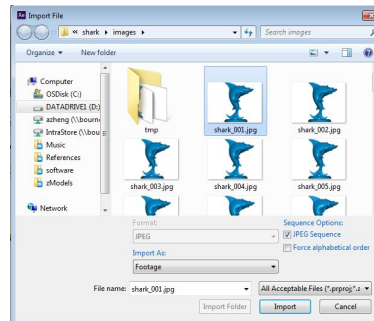

Figure 1: Import image sequence in After Effect

1.2 Create new Comp

Right click at the imported image sequence, and choose **New Comp from Selection**.

1.3 Create new Render

Under **Composition**, click **Add to Render Queue**.

1.4 Reder out result

Set the **output file** location, then click **Render** on the right of the panel to generate the movie.
